**Subject:** CFAC community liaison panel meeting

Hey Mike,

As you prepare for the meeting with the CFAC community liaison panel this Thursday, Nov 3 @ 6 pm at the Columbia Falls High School Cafeteria, here are a few thoughts:

CIP - I think it's safe to report that our Community Involvement Plan is nearing an initial draft stage that we expect to be ready to share and invite feedback on the draft CIP in late Nov, early Dec. (Remember to send me any of your comments on the draft so I can include them in my comments and response to SKEO – after they incorporate our feedback, we can share a draft for community feedback).

CAG – At the last public meeting, we started a discussion about the Community Liaison Panel and a CAG and how they are different and similar. You may want to discuss this further to see if the Panel as a group has any thoughts on the matter moving forward.

Media - Nicky Ouellet with Yellowstone Public Radio would like to interview you about the site earlier that day (if possible) in Columbia Falls or during/after the meeting. Her number is 603.568.6155. She may be reaching out to you soon to identify a time to meet. You had mentioned that the Flathead Beacon is also interested in an interview. If we line up anything further, please let me know so I can relay to Region 8 public affairs.

Sorry I will miss the meeting, thanks for covering! Let me know how else I can support you from my end.
